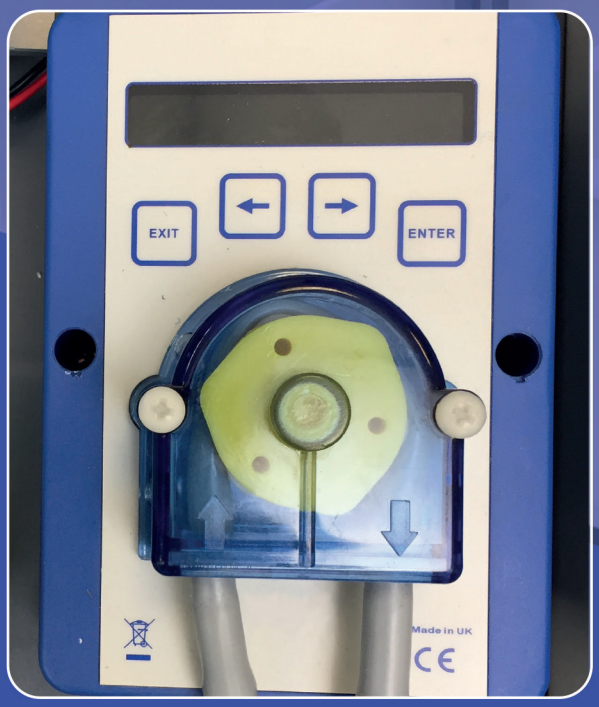
- Take control of Algae problems
- Wall mounted Safety Case
- Quick Change Biocide Concentrate
- Operator Programmable Dispensing Pump
- Long-Lasting Battery powered
- Health & Safety Compliant

Capix LD-2013 Biocide Dosing System



Automated Wash Tank Algaecide Unit

Algal growth in processor wash tanks can be problematic and difficult to control. Without effective control by use of an algaecide, growth of algae in wash tanks will be inevitable and can lead to film marking, transport and other process related problems. Use of the Capix LD-2013 Biocide Dosing System ensures an accurately metered dose of our Biocide is delivered directly to your processor wash tanks – This reduces processor downtime and the frequency of wash cleaning and keeps you in production. The LD-2013 Automated Biocide can be supplied with new installations or easily retro-fitted to existing ones.

capix

Capix Limited is a major supplier of Film & Paper Processing equipment, accessories and service support solutions for a wide range of applications. Please contact us for further information:
