Eric Lee Text Vorschläge

30 years ago Eric Lee discovered Rock'n'Roll and it became his passion. For two decades now he has been playing on concert stages and in gala performances with various band-formations.

There are very few Swiss performers who can claim to have experienced an ecstatically cheering audience in a full concert hall like the „Zurich Hallenstadion „. Eric Lee is one of them.
In Lionel Richie's warm-up band, Eric nearly stole the show.

To call Eric Lee a wonderful musician would be a great understatement. It is as if calling a Steinway concert grand simply "a piano" or referring to a Ferrari simply as "a car". His fingers fly over the keys whilst playing Boogie-Woogie and Rock'n'Roll.
Expecting Boogie, you may find Eric playing funk. Feeling your way into Funk, Eric's already making his way into Hiphop.

Eric Lee doesn't bother about classifying his music. Asked by a journalist to describe his style Lee answered: "How about just calling it music?"

Lee's unmistakable way of improvising with his band members makes his performance an immediate experience. Their harmonic variations and the unique way in which Eric Lee accompanies his songs with incredible chord sequences - all this gives Eric and his band their absolute uniqueness.
