

FC007 Tool Identification & Part Number Allocation

Objective

To ensure meaningful part numbers are allocated in a consistent and sensible manner which aids and assists in the location, collation, analysis and dissemination of information throughout and wherever that information may be used.

To ensure that all parts, tools, inserts and bases have a unique number allocated, properly, accurately and consistently.

To ensure the PDMS accurately holds the relevant part, tool, insert or base number enabling all parts and tooling to be efficiently identified and located.

All tools, inserts and bases are properly stamped and identified.
