“In our experience, Leslie Saul’s most unusual talent lies in her ability to design and adapt work environments to reflect the culture of the company as it evolves. We have turned to Leslie since our founding more than 25 years ago with confidence that she will stay focused on meeting our needs in an efficient and creative way.”

James M. Stone, Chairman

“Leslie should have been a psychiatrist. I ask her to come up with design proposals for a new lobby in an office building or the layout of a larger tenant office. During the process, she identifies my deep-seated motivations, fears, and goals and make tactful but firm suggestions for a solution. Cautiously at first, I ease myself into the process and before I know it, I feel much better. It works!”

“Leslie was instrumental in creating a fresh new look for our long-term care facility. She visited our site and immediately presented us with creative ideas and optimism at the potentials we thought never existed.

The sessions with Leslie were always full of enthusiasm. Once we presented a thought or idea, together we would develop a theme and design to compliment it. We always left with inspiration to return to our facility and begin working on the plan.
