

## Rigid PVC (แผ่นพีวีซี)

PVC sheet is one of the most versatile and economical for industrial usage. Two grades which are a) Chinese made and b) Taiwanese or Korean made can be chosen depending on the percentage of resin components

### Formats: Sheets

(gray or transparent), Rods (gray only), Welding rods (gray, transparent or blue)

- Good chemical corrosion resistibility until 60°C
- Excellent electrical insulating properties
- High mechanical strength, tensile strength and hardness
- Low water absorption
- Suitable for hot welded and glued
- Self-extinguishing

**PVC ESD** (Electro Static Dissipative grade) from Japan also available in transparent sheet format.

**Applications:** nameplate, signage for indoor use, machine cover/guard in production with acid or alkali, washing tank, tank for industrial plants, hoods, scrubbers, air duct pipe, box drain, electronic cell mat and cutting board
