

PTFE (เทปลอน)

(Polytetrafluoroethylene): A high molecular weight polymer with almost universal resistance to every chemical

Format: Sheets and Rods,

- Exceptional chemical resistance
- Anti-adhesives surface
- Service temperatures both high and very low (-200°C to 260°C)
- Outstanding UV resistance
- Excellent sliding property
- Ideally suited for soft mating partners
- Well suit for food contact

Applications: Gasket, plain bearings, gears, slide plates, support, Valve body
