# Uniform Residential Appraisal Report File No. 170517HA99

Condition Rating is determined to my best judgement and could be	viewed by another appraiser differently.
The appraisal problem did not warrant an intensive highest and bes	t use study. Given the nature of the subject real estate, my
conclusion of highest and best use was based on logic and observe	
<u> </u>	
In this appraisal assignment, I viewed the interior & exterior of the s	
physical characteristics of the subject improvements that are releva-	nt to the valuation problem.
I used information from county records, owner's comments, assess	sor's records, multiple listing service data to identify the
characteristics of the subject property that are relevant to the valuation

# **Uniform Residential Appraisal Report**

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

**SCOPE OF WORK:** The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

**INTENDED USE:** The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

**INTENDED USER:** The intended user of this appraisal report is the lender/client.

**DEFINITION OF MARKET VALUE:** The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions\* granted by anyone associated with the sale.

\*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

**STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS:** The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.
- 3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
- 5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
- 6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

#### APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

- 1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
- 2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
- 3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
- 5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
- 6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
- 7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
- 8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
- 9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
- 10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
- 11. I have knowledge and experience in appraising this type of property in this market area.
- 12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
- 13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
- 14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
- 15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
- 16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
- 17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
- 18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
- 19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.
- 20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.
- 21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).

- 22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.
- 23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.
- 24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.
- 25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

#### SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

- 1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.
- 4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

# **Uniform Appraisal Dataset Definitions**

File No. 170517HA99

#### Condition Ratings and Definitions

C1 The improvements have been very recently constructed and have not previously been occupied. The entire structure and all components are new and the dwelling features no physical depreciation.\*

"Note: Newly constructed improvements that feature recycled materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100% new foundation and the recycled materials and the recycled components have been rehabilitated/re-manufactured into like-new condition. Recently constructed improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (i.e., newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2 The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category either are almost new or have been recently completely renovated and are similar in condition to new construction.

\*Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3 The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

\*Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

\*Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5 The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

\*Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6 The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

\*Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

#### **Quality Ratings and Definitions**

- Q1 Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.
- Q2 Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residences constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high-quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.
- Q3 Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.
- Q4 Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.
- Q5 Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.
- Q6 Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure.

#### Definitions of Not Updated, Updated, and Remodeled

#### Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical /functional deterioration.

#### Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

#### Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of square footage). This would include a complete gutting and rebuild.

## **Explanation of Bathroom Count**

The number of full and half baths is reported by separating the two values by a period. The full bath is represented to the left of the period. The half bath count is represented to the right of the period. Three-quarter baths are to be counted as a full bath in all cases. Quarter baths (baths that feature only toilet) are not to be included in the bathroom count.

#### **Comments on Sales Comparison**

Comparable Search and ResultsSee Attached Addendum

The appraiser has attempted to display comparable sales that closed within the past 90 days, within one mile, bracketing GLA and room count, within 20% of the predominate for the neighborhood market, and similar in style of living to the subject. All available comparables have been reviewed and reconciled within the researched range listed at the top of page #2 of the report. The comparable properties selected are considered the best available and most comparable, therefore included and reconciled within this appraisal report. All adjustments made for comparable dissimilarities are market derived according to FNMA guidelines. Comparable adjustments are made as warranted when market research deems verifiable, justifiable and credible.

The sales and active sales utilized in this report are located within the same area as the subject and are considered comparable in general features such as location, utility, quality of construction and property appeal. All comparables provide a good competitive similarity to the subject and were considered in the value. After a thorough search of the Subject property's general market area, the appraiser utilized similar sales from nearby competing properties to complete this analysis. All comparable sales are similar and proximate. All were considered to be the best sales available at the time of this analysis.

When making comparisons with subject and applying adjustments, only those building, land and location characteristics having a material impact on value are addressed. This appraisal is based on a broad, overall comparison between the subject and the comparable sales.

The comparables used are considered to be the best available and the most representative of the subject's surrounding market.

In view of the above facts including a thorough search of the multiple listing service and with the lack of better market data currently available, this appraiser feels that the most pertinent data was selected for comparative purposes.

Actual concessions noted on the MLS listing ticket were used in this report from the pending date, not the closed date. The dollar amount for decline and list to sale price may have been rounded off. The list to sell ratio was derived from the actual sales used in this report and not taken from the 1004 MC as this data can be skewed with very low and/or very high sales and listings.

The Appraiser is aware of the lenders specific guidelines concerning time and distance of comparable data. Every effort has been made not only to remain compliant with those guidelines, but also to utilize sales that would be considered an equal substitution to the subject property. All relevant sales were carefully analyzed and the closed sales presented in the sales comparison approach to value were determined to be the best available and most representative of the subject. All sales are located on competing street locations within the community and the same school district. All comparables are located in close proximity to the subject, reflecting the typical range for the market area and school district. All comparables sales reflect homes of similar quality, location and square footage.

Differences in gross living area were adjusted at \$20.00 per square foot.

No lot size adjustement was necessary due to front footage having more value then overall lot square footage.

Room count adjustments reflect bath variance at the rate of \$4,000 per full bath and \$2,000

per half bath. Differences in number of bedrooms was reflected in the GLA adjustment. When the GLA is the same, more bedrooms usually equates to smaller rooms which offsets the number, no additional adjustments were made for quantity. No adjustment made for style as this is considered an individual buyer preference with no apathy towards subject value or marketability.

Comparable sale #1, closed on 03/2017 and is utilized for similar style, location, site size, GLA, bedroom & bathroom count and recent sale date.

Comparable sale #2, closed on 03/2017 and is utilized for similar style, location, site size, bedroom & bathroom count and recent sale date.

Comparable sale #3, closed on 06/2016 and is utilized for similar style, location, site size, GLA, bathroom count. Comparable sale #4, closed on 12/2016 and is utilized for similar style, location, site size, bedroom & bathroom count and recent sale date.

Most weight was given to comp #1 due to similar GLA, bedroom count and site size & least weight to comp #4 due to smaller GLA.

The appraiser enters a zero (0) in the grid of the Sales Comparison Approach to indicate to the reader that the particular item, which varies from the subject property, has been recognized and that no adjustment is deemed applicable. The differential is considered to be of no value, or may be of an offsetting value with another item, or no adjustment was applicable for reasons otherwise noted.

Adjustments to the comparables on the sales grid were calculated using quantitative data (paired sales) wherever possible. Some features of the subject requiring adjustment were determined using data accumulated from the appraiser's data base, peer discussions, education, and typical market reaction observed through the appraiser's familiarity with the market. While the real estate market typically acknowledges certain adjustments and elements of comparison, the market is not sufficiently refined to suggest the percentages or dollar amounts are precise even though they were treated as such. All adjustments made on the grid are per current & historical market data, buyers reaction to similar amenities, conversations with local real estate agents & by pairing superior & inferior influences studied variations for notable market features.

Exposure Time - A reasonable exposure time for the subject property at the opinion of value indicated is estimated to be 0-180 days and was derived using the current absorption rate along with the days on the market for sales in the area including the sales used in this report.

#### **Extra Comments**

Requirements for compliance with Michigan Law and the Uniform Standards of Professional Appraisal Practice

#### **ADDENDUM**

Borrower: Rudalev MI II		File No.: 170517HA99

Lender: Colony American Finance		

#### (USPAP):

In compliance with the law, the following narrative has been prepared by this appraiser to assist the client and intended user(s) to understand and properly apply the use of this appraisal report in accordance with its stated intended use to produce a credible appraisal report.

The law dictates that appraisers are required to be licensed and are regulated by the State of Michigan, Department of Licensing and Regulatory Affairs, P.O. Box 30018, Lansing, MI 48909-7504. This appraiser has completed the requirements of prelicensure and continuing education programs and is currently licensed as a Certified Residential Real Estate Appraiser. A copy of this appraiser's license, resume and errors & omissions insurance has been included in this appraisal report.

This appraiser's workfile is available when required by state enforcement agencies or due process of law at appraiser's physical address found on appraiser's license. Appraiser's workfile is available for a period of at least five (5) years after preparation and/or at least two (2) years after final disposition of any judicial proceedings, in which this appraiser provides testimony related to this assignment, whichever period expires last.

This report is subject to the requirements of Title XI of the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA) and was performed in accordance to those requirements. This report is also intended to meet the requirements of Uniform Standards of Professional Appraisal Practice (USPAP).

The Form of Certification has been approved by The Appraisal Foundation, located at 1029 Vermont Avenue, N. W., Suite 900, Washington D.C., 20005-3517. The Appraisal Foundation is authorized by Congress as the Source of Appraisal Standards and Appraiser Qualifications. This approval can be found in the Statement on Appraisal Standards Number 8 (SMT-8) on Electronic Transmissions of Reports.

This section regarding signed certification reads as follows:

Any software program used to electronically transfer a report must provide, at minimum, a digital signature security feature for all appraisers signing a report. The appraiser(s) should ensure the signature(s) are protected and that only the appraiser(s) maintain control of the signature. This control may be maintained by password (e.g. PIN numbers), hardware devices (e.g. secure cards) or other means. Electronically affixing a signature to a report carries the same level of authenticity as an ink signature on a paper copy report.

-Appraisal Standards Board, Adopted 07/18/95, Effective 01/01/96

The signatures on this appraisal are digital signatures, which are computer generated and printed on the report. The appraisal was electronically transmitted. This appraiser's signature is secured with a password, which only this appraiser has access to. No unauthorized modifications were made on this appraisal.

#### Client and Intended User:

Client: The party or parties who engage (by employment or contract), an appraiser in a specific assignment. The client may be an individual, group, or entity, and may engage and communicate with the appraiser directly through an agent. The intended user of this appraisal report is the lender / client. In the case of FHA loans, the client would also be HUD/FHA. No additional intended users are identified by the appraiser. This report contains sufficient information to enable the lender / client to understand the report. Any other party receiving a copy of this report for any reason is not an intended user; nor does receiving a copy of this report result in an appraiser-client relationship. Use of this report by any other party(ies) is not intended by the appraiser. These terms are referenced in this form as appropriate according to the law. These terms may only be extended to the degree that the law will accommodate.

#### **Intended Use:**

The intended use is to evaluate the property that is the Subject of this appraisal for a mortgage finance transaction, subject to the stated scope of work, purpose, reporting requirements, and definition of market value.

#### Type and Definition of Value:

This appraisal report is stating a market value for the Subject Property that is consistent with the requirements of federal law (12 CFR, Part 34) and consistent with the definition given within the FNMA form.

#### Highest and Best Use (defined):

The reasonably probable and legal use of vacant land or an improved property, which is physically possible, appropriately supported, financially feasible, and that results in the highest value. The four criteria the highest and best use must meet are legal permissibility, physical possibility, financial feasibility, and maximum productivity.

Based on this appraiser's personal knowledge of the area and research that has recently been done for properties in this market, along with this appraiser's first-hand knowledge of Subject Property, this appraiser has determined that the zoning designation as noted reflects its current highest and best use.

#### **Additional Scope of Work:**

At the request of the client, this appraisal report has been prepared in compliance with the Uniform Appraisal Dataset (UAD) from Fannie Mae and Freddie Mac. The UAD requires the appraiser to use standardized responses that include specific formats, definitions, abbreviations and acronym. This appraiser attempted to obtain an adequate amount of information in the normal course of business regarding the Subject and its comparables. Some of the standardized responses required by the UAD, especially those in which the appraiser has not had the opportunity to verify personally or measure, could mistakenly imply greater precision and reliability in the data than is factually correct or typical in the normal course of business. Examples include condition and quality ratings as well as comparable sales and listing data. Not every element of the Subject Property was viewable and comparable property data was generally obtained from third-party sources including MLS, assessment records, agents, etc.

1a. Inspection (Includes) - This appraiser's inspection of the Subject Property focuses on the following: to confirm the

#### **ADDENDUM**

Borrower: Rudalev MI II	File No.	: 170517HA99
Property Address: 17953 Harman St	Case N	0.:
City: Melvindale	State: MI	Zip: 48122
Lender: Colony American Finance		•

geographic location of the Subject Property; to confirm the approximate square footage of the site and the dwelling as well as attached/detached improvements; to confirm its internal and external amenities; to consider different types of depreciation (when applicable) and their affect (if any) on value and/or marketability; to photograph the Subject Property; to consider the overall quality of construction of the Subject Property's improvements.

- 1b. Inspection (Does Not Include) This appraiser is not qualified to perform an overall structural inspection of the Subject Property. As part of FHA and Conventional inspections, certain tests of the mechanical systems are performed on the Subject Property. The furnace/boiler is checked for warm air/plumbing leaks, the plumbing is checked for water pressure, leaks in the piping and water heater and electrical is checked in all rooms. It is recommended that the client/intended user of this report obtain the services of qualified professionals to perform test above and beyond what this appraiser checks.
- 1c. Inspection (Photographs) This appraiser is required to take photographs of the front, street scene, sides and rear of the Subject Property. In most cases, the client/intended user may require interior photographs for interior/exterior property inspections. Some digital images in this report may be from MLS Image and/or Appraiser's Personal Library. The Subject Property was inspected and photographed on the date indicated. The comparables were also inspected but only from the road, unless otherwise stated.
- 1d. Sources of information ( if appropriate) The appraiser has obtained and utilized information from the appropriate township, city or county records. In addition, this appraiser also utilized information from REALCOMP online MLS, BS&A Assessment Website, Access Oakland, Realist and Public Records Data. Information obtained or provided by the aforementioned sources is deemed to be reliable. This appraiser may gather information through the parties of the transaction for the Subject Property and/or comparable(s) if information, is not available by other sources.
- 2. 1 mile rule This appraiser has researched sales within 1 mile of the Subject Property. If a minimum of three comparable sales were not available within one mile, this appraiser then searched beyond one mile. The section of this report called 'Comments on Sales Comparison' will summarize if any comparable(s) exceeds a 1 mile distance from the Subject Property. 3. 6 months rule This appraiser has viewed sales within the past 6 months (based on the 'as of' (effective) date stated within this report). If a minimum of three comparable sales were not found by the initial search, this appraiser then expanded the search criteria up to 12 months and beyond as deemed appropriate. The section of this report called 'Comments on Sales Comparison' will summarize if any comparable(s) exceeds 6 months old (based on the 'as of' (effective) date stated within this report).
- 4. Title issues this appraiser is typically not provided with a copy of a title report or commitment of title insurance; therefore, the appraiser has relied upon information available via the multi-list, BS&A on-line data services, Access Oakland, and the city/township assessor to confirm the owner of the property. This appraiser is not a qualified title examiner; therefore, it is recommended that the client/intended user obtain proper title information from a qualified title expert or title company as to the identification of the owner of record.
- 5. The appraiser reserves the right to inform any future potential client of any prior assignment or services regarding the Subject Property, or any part thereof, in accordance with the provisions required within the Ethics Section of USPAP 2010-11. Such notification will be of the fact that a previous assignment was preformed within the past 36 months. It shall not includespecifics or details of the analysis or the results of any conclusions drawn from such analysis. This appraiser has prepared this appraisal in full compliance with the Dodd-Frank non-influence code and has not performed, participated in, or been associated with any activity in violation of the Code.
