Freddie Mac Form 70 March 2005

UAD Version 9/2011

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.
- 3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
- 5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing the appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
- 6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

Freddie Mac Form 70 March 2005

UAD Version 9/2011 Page 4 of 6

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

- 1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
- 2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
- 3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
- 5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
- 6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
- 7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
- 8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
- 9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
- 10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
- 11. I have knowledge and experience in appraising this type of property in this market area.
- 12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
- 13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
- 14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
- 15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
- 16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
- 17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
- 18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
- 19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.
- 20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

Freddie Mac Form 70 March 2005

- 21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).
- I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.
- 23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.
- 24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.
- 25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

- 1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.
- 4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q-

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Ω4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and ungrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:

3.2 indicates three full baths and two half baths.

SUBJECT DATA

Rudalev MI II

Lincoln Park

1654 Chandler Ave

Colony American Finance

PRIOR SERVICE

I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.

Borrower

City

Property Address

Lender/Client

The zoning designation in the site section is as noted. This is the only information available and should not be relied upon by any third party. No other specific guidelines are with the subject's zoning. The appraiser recommends that the Client or any third party first verify information regarding zoning and permitted use of the subject property including such items as set back requirements, minimum or maximum sizes allowed, non-conforming uses, etc. The appraiser is not responsible for any errors or changes regarding zoning matters.

NEIGHBORHOOD BUILT-UP AND LAND USE

There does not appear to be a clear definition of built-up vs. land use of a neighborhood in USPAP. Therefore, in this appraisal, the following will be used as definitions:

Built-up - The % built up is for the buildable land, both commercial and residential, in the neighborhood. There is no assumption of future land splits and such. Also, the appraiser has no knowledge as to the large City/County owned properties if they are usable and/or buildable and therefore, not included in the built-up percentage.

Land use - The % land use is for all land and bodies of water in the neighborhood.

The data provided is only an estimate, as an exact figure would be beyond the scope of work of this appraisal. This does not appear to adversely affect the credibility of this appraisal.

CONDITION OF IMPROVEMENTS

All updates made to the subject property are considered and included in the "Condition" rating and all of the upgrades are considered and included in the "Quality of Construction" rating obtained from Fannie Mae UAD Appendix D. See attached definitions.

Subject's characteristics include but not limited to: The subject's location is considered to be residential, the view is residential, and the site is a typical subdivision lot for the area.

Based on a visual inspection of the roof and the interior ceilings for signs of leaks, there does not appear to be any damage to the roof. All the utilities are on and appear to be in working order.

The basement is unfinished.

The exterior amenities include: Porch.

INCOME APPROACH - The appraiser has considered the income approach in this assignment. The subject is a single-family dwelling, and there is insufficient rental data for similar homes in this market area to produce a reliable estimate of market rent for the subject, and a GRM. Because it could not be reliably developed, the income approach has been omitted in this appraisal.

COST APPROACH - The cost approach has been included solely at the request of the client. It was given no weight in arriving at the final opinion of value because of the difficulty in developing and supporting estimates of cost new and accrued depreciation. There is limited data available with which to reliably develop this approach for a structure of this age, and therefore the results of this approach are not considered meaningful or relevant. The estimates of cost new, accrued depreciation, site value, as well as the value indicated by this approach, should not be relied upon by any party for any reason. Appraiser does not assume responsibility for misuse of data and conclusions by others. This appraisal is not to be used by any party for insurance purposes.

SALES COMPARISON COMMENTS

The appraiser has chosen what are believed to be the most current and similar comparables available from the marketplace. Therefore, the comparables are considered reliable indicators of value. Adjustments in the "Market Data Approach" are based on market extraction, not cost figures.

CONCESSIONS - In this market area, seller concessions are common and therefore, adjusted dollar for dollar.

SITE - The adjustment for site is determined not only for size but for utility and contribution to the overall demand of the location. If the site is on acreage, a cul de sac or other premium location the adjustment, if any, would be determined on the appraiser's estimate of overall 'market value' contribution. Appropriate adjustments are made if warranted.

BEDROOMS - In this market, 3+ bedroom homes are considered as "typical" for market. In this appraisal, bedroom counts of less than 3 are adjusted accordingly.

BATHROOMS - In the grid, the bathroom count is noted as 1 for each full bath and as 0.1 for each half bath. Bathrooms in the basement are not considered in the total above ground count but are included in the overall basement finish.

FIREPLACE & SHED - If the subject has a fireplace and/or a shed, the appraiser makes no adjustment for these due to the fact that there is no data to suggest added value to the home. Therefore no adjustments is warranted.

BASEMENT & FINISH - The subject's basement size and amount finished will be reported for the subject. For comparables, the appraiser will make an attempt to interview the RE agents involved in this transaction in the normal

Supplemental Addendum

		Supplemental Addendam	1110	110. 0317-133	
Borrower	Rudalev MI II				
Property Address	1654 Chandler Ave				
City	Lincoln Park	County Wayne	State MI	Zip Code 48146	
Lender/Client	Colony American Finance				

File No. 0517 155

course of business to obtain relevant basement data. In the event there is no response from RE agents, the appraiser will make the following "extraordinary assumptions":

a) That the basement data on the listing ticket is correct. b) If the basement is noted in the listing ticket to be "finished", then it will be noted in the grid as 80% finished. c) If the basement is noted in the listing ticket to be "part-finished", then it will be noted in the grid as 50% finished.

The above assumptions are market driven and based on a "typical" buyers perception of finished area in a basement. In this section, the appraiser will make any and all appropriate adjustments pertaining to the size, finish, and the foundation type of the basement.

ROOMS BELOW GRADE - The subject's rooms below grade will be noted and adjusted for in this section. The appraiser makes an adjustment for bath count and kitchen only (if available) in this section of the grid. Difference in room count is not adjusted for as this would be considered a "personal preference". That is, to have the basement partitioned or have one large room is a personal preference.

Basement adjustments are made as follows:

Size \$2 sf. Finish \$2 sf.

AGE - All comparables are within FNMA guidelines. No adjustment is made for age difference of less than 20 years.

SIZE - The acceptable GLA variance rule of 20% is exceeded, in reference to Comparable #2, because a search of the MLS Database and public records reveal a lack of comparables similar in condition that sold recently. No adjustment is made for GLA differences of less than 100 square feet.

GARAGE - In this market and according to feedback from local realtors, it appears that an attached garage adds more value to a home than a detached garage. Therefore, an appropriate adjustments is made when warranted.

SALE DATES (greater than 6 months) - The subject is located in a stable market. Due to a lack of qualified closed comparative data of similar size, condition, and utility in the subject's immediate area, it is necessary to exceed FNMA guidelines for sold dates of greater than six months. No adjustment is warranted at this time for sale date. This is acceptable in this market area.

NET/GROSS - The subject is a 1,604 sf. Bungalow design style home. A search of the MLS database reveals a lack of recently sold comparables that are similar in size, condition, and located within 1 mile in proximity and sold within 1 year of this appraisal. Appraiser chose comparables #1 - 3 that are believed to be the next most similar and proximate comparables to the subject and therefore, after making the appropriate adjustments, appraiser exceeds the acceptable guidelines of 10% of single-line adjustments, exceeded the acceptable guidelines of 15% for net adjustments and 25% for gross adjustments.

HIGH/LOW ADJUSTED VALUES - The high/low ratio of the adjusted values exceeds the acceptable 15% due to the varying intangibles such as condition/updates/upgrades of homes in the area, and lack of sales.

ADJUSTMENTS - Adjustments to the comparables on the sales grid were calculated using quantitative (paired sales) whenever possible, often some features of the subject requiring adjustment were determined using data accumulated from the appraiser's database, peer discussions, education, and typical market reaction observed through the appraisers familiarity with the market.

The above variances, with the appropriate adjustments, will not adversely affect value.

EXPOSURE TIME

In appraiser's opinion, a reasonable exposure time for the subject property developed independently from the stated marketing time is 1 - 3 months.

OPINION OF VALUE DEVELOPMENT

Comp 1 is most similar to subject in condition, having no garage, and therefore, given primary weight.

The remaining comparables are in order of similarity to the subject and weighted, in that order, in developing the final opinion of market value. The listings provided, are not used to develop but only to support value.

ANS-221457 Market Conditions Addendum to the Appraisal Report File No. 0517-155 The purpose of this addendum is to provide the lender/client with a clear and accurate understanding of the market trends and conditions prevalent in the subject neighborhood. This is a required addendum for all appraisal reports with an effective date on or after April 1, 2009. ZIP Code 48146 Property Address 1654 Chandler Ave City Lincoln Park Borrower Rudalev MI II Instructions: The appraiser must use the information required on this form as the basis for his/her conclusions, and must provide support for those conclusions, regarding housing trends and overall market conditions as reported in the Neighborhood section of the appraisal report form. The appraiser must fill in all the information to the extent it is available and reliable and must provide analysis as indicated below. If any required data is unavailable or is considered unreliable, the appraiser must provide an explanation. It is recognized that not all data sources will be able to provide data for the shaded areas below; if it is available, however, the appraiser must include the data in the analysis. If data sources provide the required information as an average instead of the median, the appraiser should report the available figure and identify it as an average. Sales and listings must be properties that compete with the subject property, determined by applying the criteria that would be used by a prospective buyer of the subject property. The appraiser must explain any anomalies in the data, such as seasonal markets, new construction, foreclosures, etc. Prior 7-12 Months Inventory Analysis Prior 4-6 Months Current - 3 Months Overall Trend Declining Total # of Comparable Sales (Settled) 10 Increasing Stable Absorption Rate (Total Sales/Months) Increasing Stable Declining 1.67 1.33 1.33 Total # of Comparable Active Listings Increasing Declining Stable 3 3 Months of Housing Supply (Total Listings/Ab.Rate) Declining Stable Increasing 1.2 2.3 2.3 Median Sale & List Price, DOM, Sale/List % Prior 7-12 Months Prior 4-6 Months Current - 3 Months Overall Trend Increasing Declining Median Comparable Sale Price Stable \$79,900 \$74,500 \$80,200 Median Comparable Sales Days on Market Declining Stable Increasing 15.5 25 39 1 Stable Declining Median Comparable List Price \$72,900 Increasing \$50,600 \$84,700 Median Comparable Listings Days on Market Stable Declining Increasing 42 59.5 20 Median Sale Price as % of List Price Stable Increasing Declining 94.62 103.65 98.33 Stable Seller-(developer, builder, etc.)paid financial assistance prevalent? No Declining Increasing Yes Explain in detail the seller concessions trends for the past 12 months (e.g., seller contributions increased from 3% to 5%, increasing use of buydowns, closing costs, condo The data used in the grid above does not indicate there were any concessions associated with the reported transactions. However, this is not a mandatory reporting field for agents and there may be some transactions that do include concessions, but have not been reported. It is beyond the scope of this assignment to confirm each sale used in the Market Conditions Report Are foreclosure sales (REO sales) a factor in the market? ⊠ No If yes, explain (including the trends in listings and sales of foreclosed properties). Yes The data used in the grid above does not indicate there were any REO/Short sales or other distressed properties associated with the reported transactions. However, this is no a mandatory reporting field for agents and there may be some distressed sales that were not reported. It is beyond the scope of this assignment to confirm each sale used in the Market Conditions Report. Cite data sources for above information. RealComp MLS and Public Records. Foreclosure, REO and Concession estimates are based on data in the MLS, public records reviewed by the appraiser, statistics published online and in the local media. The data was "cleaned" prior to analysis to remove isolated transactions that were numerically distant and may be misleading. If a field indicates N/A or it's shaded, that means the local MLS does not provide this information. Summarize the above information as support for your conclusions in the Neighborhood section of the appraisal report form. If you used any additional information, such as an analysis of pending sales and/or expired and withdrawn listings, to formulate your conclusions, provide both an explanation and support for your conclusions The appraiser considered only those homes that are competitive to the subject, only those that are similar in physical characteristics, lot size, view, condition, etc, at three levels; the market area level, the neighborhood level and the immediate area level and considers directly competitive and reasonable alternatives. The indicated " median, totals, etc." may slightly vary from gross numbers reported by the MLS, etc., but reflect trends, totals less impacted by abnormal transactions. If the subject is a unit in a condominium or cooperative project, complete the following: Project Name: Current - 3 Months Subject Project Data Prior 7-12 Months Prior 4–6 Months Overall Trend Total # of Comparable Sales (Settled) Stable Declining Increasing Absorption Rate (Total Sales/Months) Increasing Stable Declining Total # of Active Comparable Listings Stable Declining Increasing Stable Months of Unit Supply (Total Listings/Ab.Rate) Declining Increasing Are foreclosure sales (REO sales) a factor in the project? If yes, indicate the number of REO listings and explain the trends in listings and sales of Yes No foreclosed properties. Summarize the above trends and address the impact on the subject unit and project.
