

The Luna is a traditional round spa but unlike most round spas it has quite a few jets. You will notice that there are several seats with groups of jets, one of which includes neck jets and a special cushion that helps avoid water splashing upwards into your face. The other important feature in this spa is the Volcano foot jet that sends out a huge amount of water right in the center of the spa. With room for 5 persons this spa fits almost anywhere and the beautiful design of the shell insures comfortable seating for all.

## SPECIFICATIONS
