Creating Valuable Places

From the wineries of Europe to the outback of Australia, people have long taken advantage of natural and engineered caves. Through Mancala's expertise, underground cellars along with home theatres, libraries, dining rooms and peaceful, quiet retreats are possible.

Add value to your property by creating new usable spaces on your existing real-estate footprint.

Concept and Design

Mancala works with its clients to ensure its concepts and designs take into consideration ventilation, sound proofing, vibration, climate control, environmental requirements and statutory approvals. While the work carried out in these spaces utilises mining techniques, we engage effectively with architects and interior designers to help create the space and feel that you require.

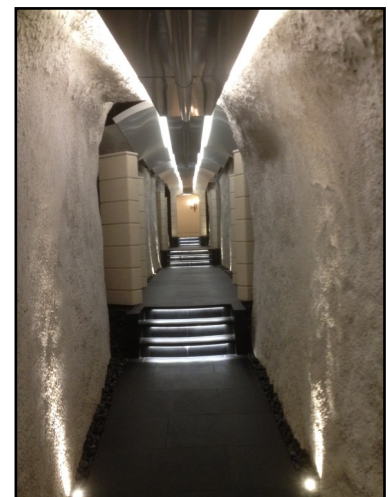

Progress

Each space is unique. We work closely with our clients every step of the way to ensure they are aware of the progress of the commission. We lead clients through the process, keep them informed and communicate constantly. Mancala is committed to its practice of personalised service and cost-effective, innovative construction and mining solutions.

The Finished Product

The end result can be as varied as a commercial winery, the space being used to make and store wines; underground accommodation for hotels or private retreats and hideaways. Mancala's cave works encompasses a range of services and techniques which ensures your expected outcome.

The Mancala Group

- **SAFETY:** Striving to achieve zero harm
- **QUALITY:** Taking pride in what we make and do; on time, on budget and to specification
- **INTEGRITY:** Doing what we say we will do with honesty and respect
- **INNOVATION:** Revolutionising processes and applying technology to achieve better outcomes for all stakeholders
- **PEOPLE:** Recognising people as our greatest asset and encourage personal excellence
