Hi-Tech, Swiss-Engineered, Premium Quality **Quantum Hyperlight Optics[®]**

BIOPTRON[®] 
LIGHT THERAPY SYSTEM by Zopter Group

0800 774 885

THE® Glasses provide active hyperlight therapy that maintains, strengthens and revitalizes the body of the wearer on a quantum level.

THE® Glasses protect against harmful rays from natural and artificial lighting, sunlight and the light from electronic devices, and in particular against their combined effect to which we are exposed around the clock.

THE® light passing through the fullerene layer of **THE®** Glasses becomes **an optimized and hyperharmonized, a unique, healthy light**

Fullerene C₆₀, a quantum-mechanical light transformer and a quantum-mechanical Quantum Hyperlight generator

COGNITIVE ABILITIES

Quantum Hyperlight is created by passing light through the **Quantum Hyperlight Optics®** lens, which positively affects both vision and brain function. This contributes to the general improvement of the wearer's physical and mental state, thereby optimising the body functions.

- **THE®** Glasses enhance concentration, attention and memory
- **THE®** Glasses increase productivity and efficiency
- **THE®** Glasses are helping faster and better decision-making
- **THE®** Glasses support optimal mental performance during intense mental overloads

Anytime. Anywhere.

0800 774 885

VISION

Eye Protection

THE® Glasses protect the eyes by eliminating and transforming dangerous UV and blue radiation into the wavelengths (green, yellow, orange, red light) optimum for the molecular structure of the eye. Further, they protect the eyes from excessive amounts of combined light energy from all the light sources we are exposed to (artificial light, light from electronic devices and sunlight), because they let the ideal amount of the total energy through.

- **THE®** Glasses protect your eyes from various ailments
- **THE®** Glasses strengthen the eye ciliary muscle
- **THE®** Glasses decelerate the onset of cataract
- **THE®** Glasses prevent senile degeneration of the macula
- **THE®** Glasses postpone the need for wearing corrective eyeglasses

Improving Both Vision and Mind

THE® Glasses provide a sharper image even in poor light conditions and contribute to better and faster decision-making, thus making us more efficient and successful in everyday professional and leisure activities.

- **THE®** Glasses reduce the scattering of light inside the eye
- **THE®** Glasses improve visual acuity
- **THE®** Glasses increase contrast sensitivity and colour intensity and reduce reflection
- **THE®** Glasses eliminate fatigue and discomfort in the eyes
- **THE®** Glasses prevent the blinding effects of sudden bright light

STYLE & BEAUTY

THE® Glasses have an anti-aging effect on the skin around the eyes. They eliminate and convert dangerous UV and blue light spectrum radiation into desirable light waves that maintain and stimulate natural regeneration/synthesis of collagen and elastin. This contributes to alleviating the existing and preventing the emergence of new wrinkles around the eyes. Such a unique feature is another reason to wear them both indoors and outdoors!

- **THE®** Glasses function differently than all other glasses and they also look distinctive
- **THE®** Glasses are a fashionable detail that will mark your style as well

HORMONAL STATUS

THE® Glasses uniquely optimize the levels of **serotonin** ("happiness hormone"), **dopamine** ("pleasure hormone"), **melatonin** (the hormone responsible for sleep regulation) and **cortisol** (stress hormone), bringing them into a natural balance, crucial for a healthy mental and physical functioning of the organism.

- **THE®** Glasses establish psychological balance and strengthen self-confidence
- **THE®** Glasses improve mood and lower stress level
- **THE®** Glasses reduce anxiety, depression and aggression
- **THE®** Glasses regulate sleep disorders and significantly reduce the consequences of jet lag
- **THE®** Glasses raise and maintain the necessary level of vitality throughout the day

Who Will Benefit from **THE**® Glasses, When and Where

Everyone who cares about themselves and works hard and lives an active lifestyle: you, students, pupils, policemen, professors, pilots, soldiers, drivers (professional and amateur), athletes, politicians and parliamentarians, etc. **All of us who are exposed, on a daily basis, to dangerous radiation of sunlight, as well as artificial lighting indoors** (house, work, school, concerts, shopping centres, etc.).

Anytime. Anywhere.

0800 774 885

Good Eyesight Is the Key to Good Health

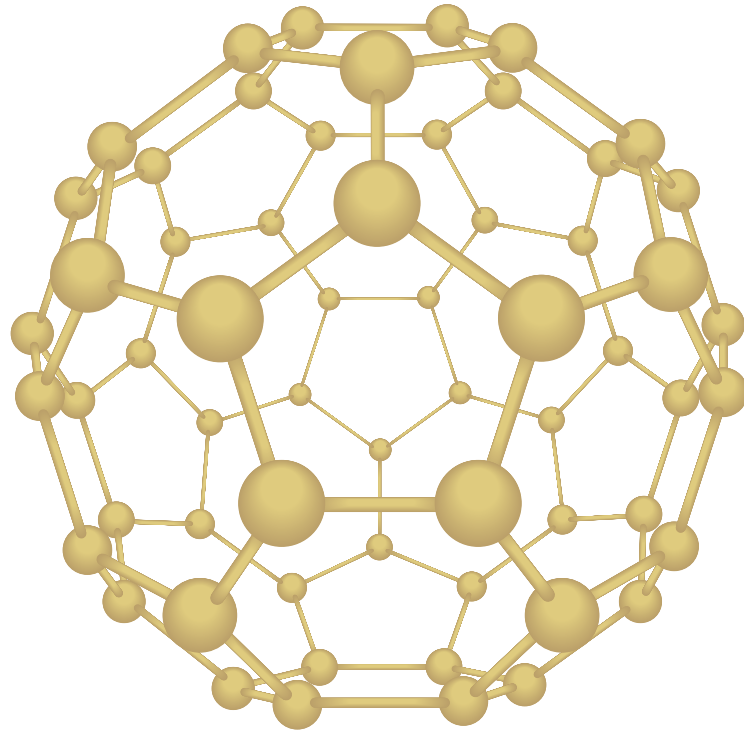

Our eyes do not have natural, physiological protection against dangerous photons of high-energy light (UV and blue) from the sunlight, artificial illumination and radiation from electronic devices. This harmful light irreversibly damages our eyes, causing cataract and the degeneration of the macula. What is more, such light adversely affects brain functions and our general health.

THE® Glasses represent a unique solution to improve both vision and brain functions, because they block harmful radiation and simultaneously convert it into an optimum range of quantum hyperlight that reflects an ideal symmetry that is identical to biological structures. **THE**® Glasses will help you become more vital, healthier and more successful.

See better • Feel better • Think better • Perform better

THE® Glasses Are Inspired by the Discovery of the Fullerene C₆₀ Molecule

Nobel Prize,
1996

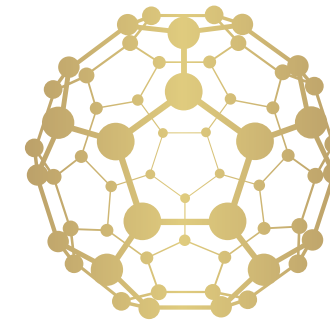

The Nobel Prize in Chemistry was awarded to the scientists Kroto, Smalley and Curl in 1996 for the discovery of fullerene C₆₀, a molecule of the Fibonacci's icosahedral symmetry structure. Fullerene C₆₀ is the third allotropic form of carbon in addition to graphite and diamond, **and has the identical, universal symmetry of biological structures and of the whole universe, which has dodecahedral symmetry, according to Plato.**

0800 774 885

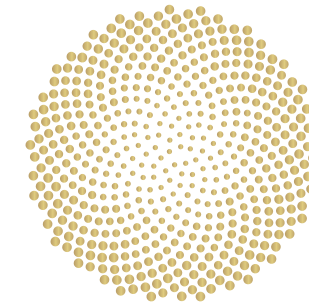

Hyperharmonization of Light

THE® Glasses are based on the C₆₀ molecule, generating unique, powerful and beneficial hyperlight with ideal dynamics at the level of quantum energy and information. Interacting with the C₆₀ molecule, which is "alive" and twisting/vibrating/rotating at an incredible 18 billion times per second, photons from any light source take on a quantum torus arrangement in conformity with the rule of the golden ratio.

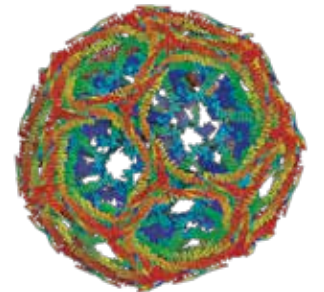

The quantum hyperlight of the ideal symmetry, which is identical to certain biostructures, directly interacts with biomolecules (particularly clathrin in the brain) and transmits both optimum energy and optimum information at the cellular level.

Fullerene C₆₀

Hyperharmonized
light

Clathrin

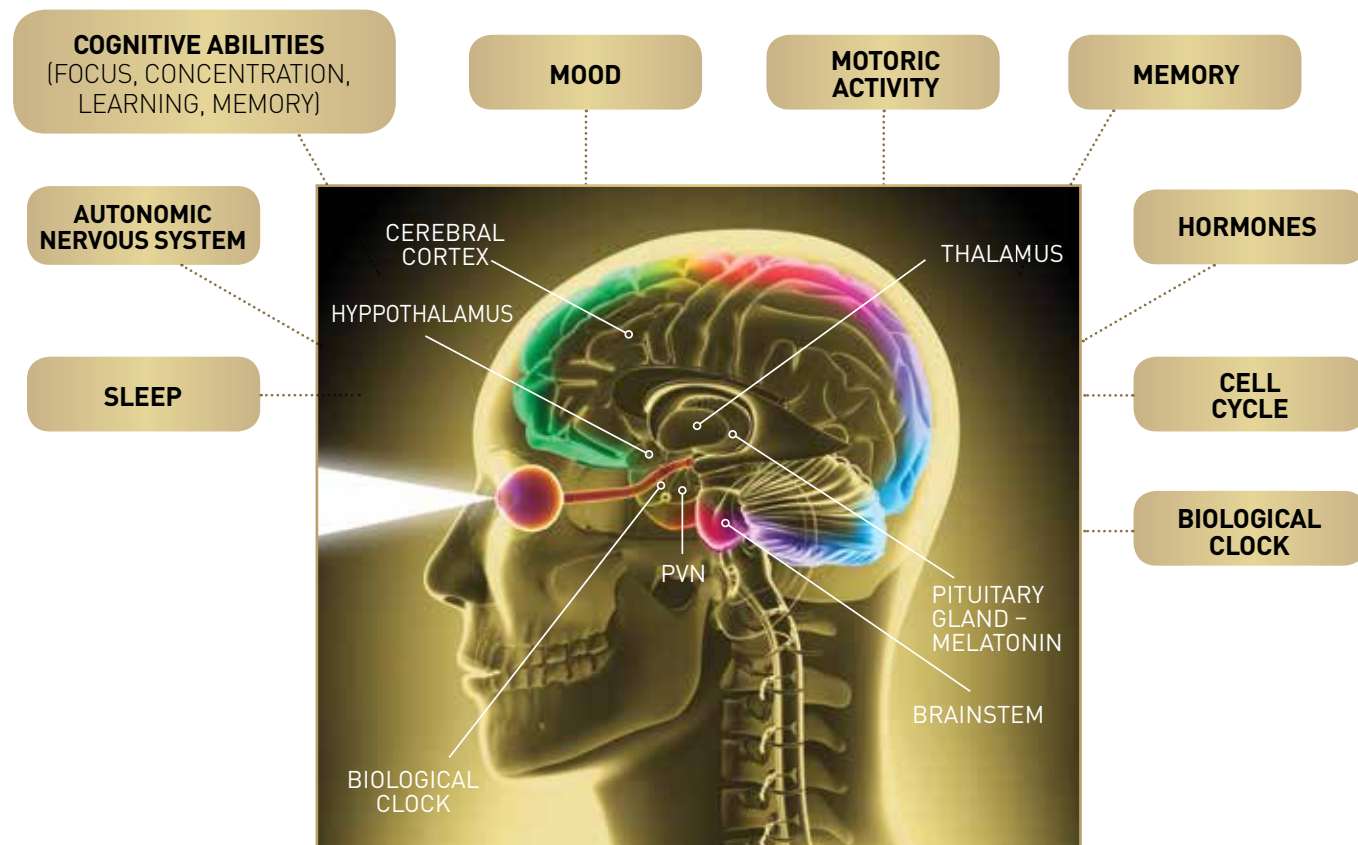

Rod cells in the eye

The transfer of energy and information of hyperharmonized light to the disturbed energy structures of **biomolecules leads to regeneration of their natural functions, leading to harmonization and healing.**

The Influence of Light on the Brain

Light regulates the levels of hormones in the brain, i.e. the circadian rhythm. The Nobel Prize in Medicine for 2017 was awarded to scientists Hall, Rosbash and Young for this discovery.

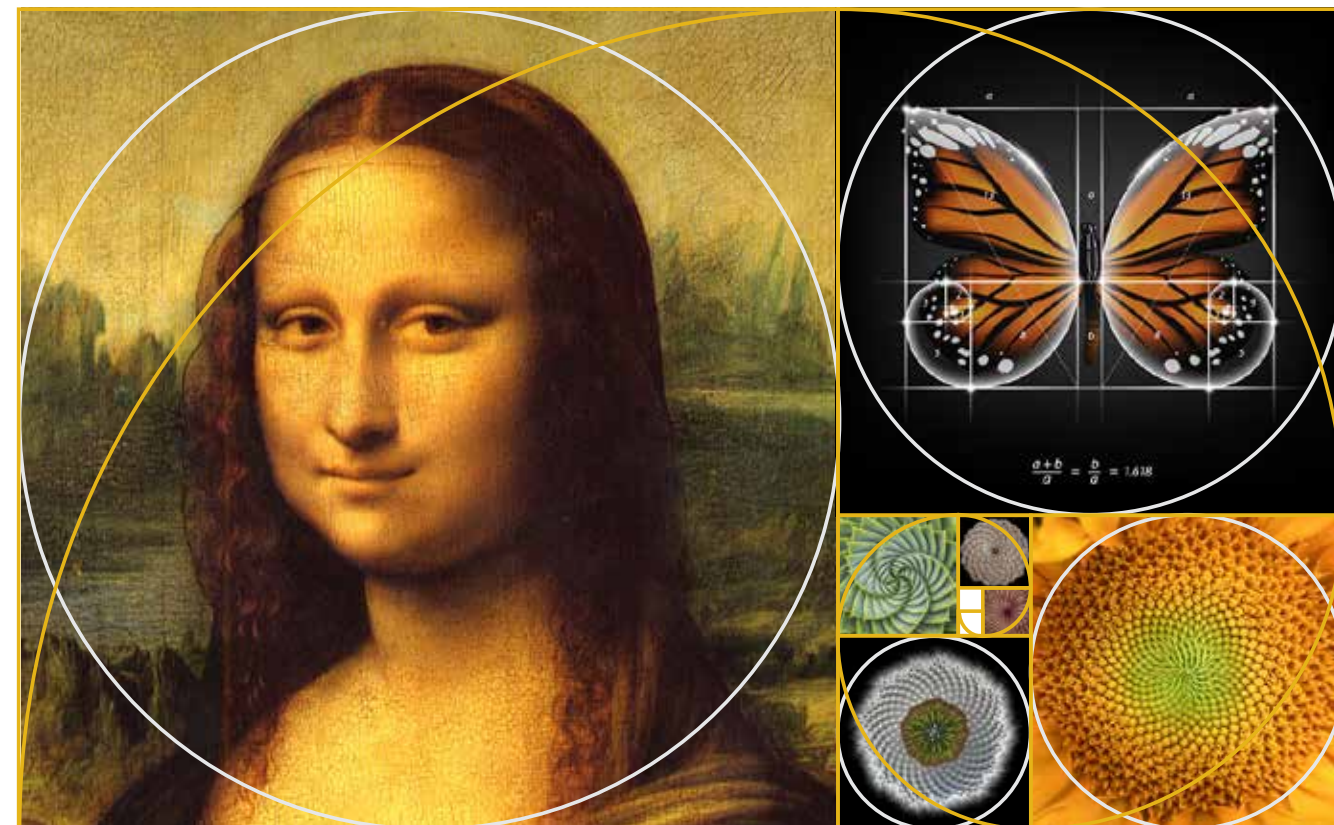

THE® Glasses enable users to regenerate biomolecules and biostructures in a unique way, maintaining optimum bioprocesses in the eyes and brain. The result is a psychophysical balance - we see better, we feel better, we think better, we are more productive and more successful. All this makes the choice of these glasses necessary, reasonable and intelligent for each individual.

0800 774 885

Golden Ratio - Universal Law of Harmony and Beauty

Leonardo da Vinci recognized that geometry is based on divine proportions (the law of nature inserted into the rule of Golden Ratio), and constitutes the foundations of the laws of harmony and beauty. The Golden Ratio is as well the principle by which **biological structures get into spatio-temporal interaction with Quantum Hyperlight, thus achieving the resonant transfer of energy and information regenerating the organism at the quantum level.**

See better • Feel better • Think better • Perform better

Transformation of light

SUNLIGHT

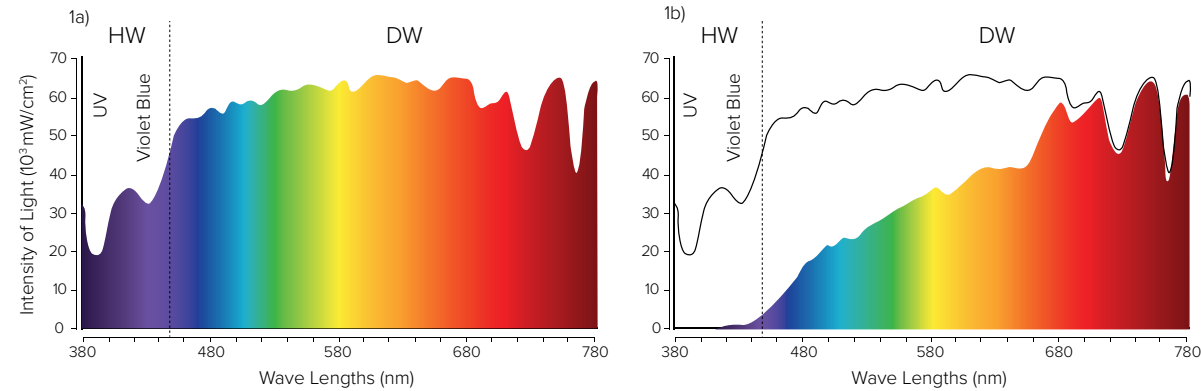

Diagram 1a displays a visible spectrum of sunlight. It shows harmful wavelengths (HWs) (violet and blue light) and other desirable wavelengths (DWs) (450–780 nm) the intensity of which is often in excess of the optimum.

Diagram 1b displays a visible spectrum of sunlight passing through **THE®** Glasses. The transformation of light is such that HWs are largely eliminated, while blue light is greatly reduced. The unique performance of the **Quantum Hyperlight Optics®** lens is such that excessive amounts of solar energy are **transformed to the optimal level for the eyes**.

THE® Glasses reduce hazardous UV and blue rays coming from any source of light.

Due to the **dual nature** in regulating the quantity of light passed through, **THE®** Glasses are unique and without competition in the global market. **THE®** Glasses have the ability to:

NEON LIGHT

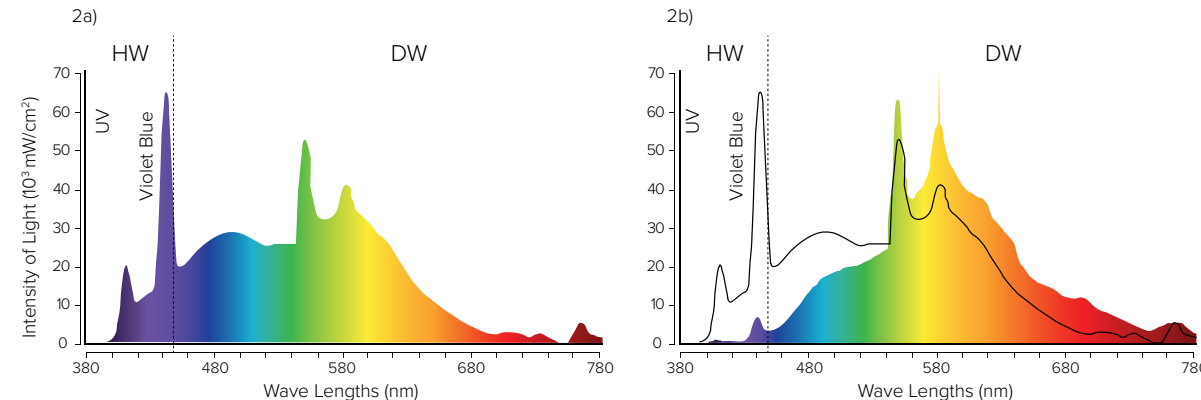

Diagram 2a displays a spectrum of neon light with high amounts of HWs, whereas the amount of energy with DWs is usually less than optimal (450–780 nm).

Diagram 2b displays a neon light spectrum passed through **THE®** Glasses. As we can see, the neon light has changed: violet and blue light have been transformed to desired wavelengths (450–780 nm), hence their insufficient **energy has been raised**, in a unique way, **to an optimum level for the eye and brain functioning**.

1. **Decrease** excessive sunlight, thereby protecting the eyes.
2. **Increase** the missing energy of desirable wavelengths (in artificial light sources), transforming harmful wavelengths into desirable ones.

LED LIGHT

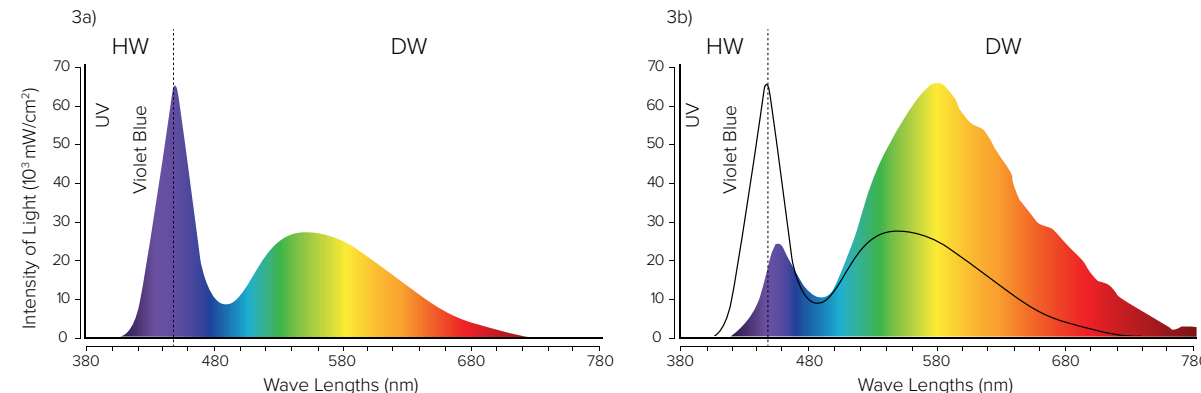

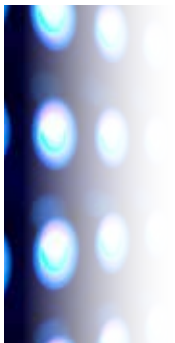

Diagram 3a displays a spectrum of white LED light with violet light and a pronounced quantity of blue light. The amount of energy at desired wavelengths is considerably lower than the optimum (450–780 nm).

In diagram 3b, we can see that, by passing through the **Quantum Hyperlight Optics®** lenses, the LED light is converted into a healthy Quantum Hyperlight. The HWs are transformed into DWs, while the insufficient intensity of LED light is **transformed to the optimum level of energy for the functioning of the eyes**.

Such unique, quantum hyperlight is optimal, effective and healthy for the eyes and brain, for the harmonious and healthy functioning of the organism.

“**THE**[®] Glasses are not just for seeing better, but also for feeling better. They are an experience by themselves. I recognize their magical effect. It is like a dance of passion and vision of the unity of the body, soul and totality.
THE[®] Glasses have changed my experience of the world and have brought me an overall boon. When I use glasses I have the same feeling as when I'm in love.”

Ana

Quantum Hyperlight Optics® lenses of unique features and superior quality are made by using Swiss technology and they are much more than ordinary lenses: **they are designed for better human health, better cognitive abilities, better looks and better quality of life.** In this way, they contribute to our mission:

Feel better. Live better

Quantum Hyperlight Optics® lenses are coated on both sides with the finest protective layers. They are easy to maintain, scratch-resistant and have a long lifespan. Quality production of the lenses and frames make **Tesla Hyperlight Eyewear®** glasses a cutting-edge and elegant product.
