

The **Colenta 140** and **160 PCB 90** Film processor options are the ideal choice to support the large format film plotter options available from Ucamco.

The choice of the Colenta **140 PCB 90** or **160 PCB 90** Film Processor is subject to :-

- Model of plotter in use,
- Maximum film size to processed / manual loading
- Available room space,

Colenta offer good and economical solutions for the **Ucamco BG7600** and **BG7500 Plotters**, all can be discussed during pre-installation planing.

Within this folder there are a number of pictures and 3D drawings demonstrating an actual working setup and produced by **Colenta** for the **BG7600**
