

Solvent Distiller

Art. LT/SD-260000/M

Solvent Distiller

- Suitable to recover non-flammable solvents by means of heat and condensation process
- Made entirely in stainless steel
- Two chambers: the first one is for collecting the dirty solvent by means of a funnel and sieve device for subsequent distilling; the second one is for recovering the cleaned solvent
- Thermostat automatically interrupts heating process of first reservoir once distillation has been completed
- Highest temperature: 150°C
- Capacity: 10 l/h
- Capacity of distillation and collecting reservoir: 6 + 6 litres

Spare Parts

LAB-102-601: level indicator, pack of 2

LAB-102-602: relay

LAB-110-012: heater

LAB-150-009: thermostat 210°
