

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Class P EUR Shares (ISIN: IE00BF4NL061) (the “Class”)

Blackwall Europe L/S Fund (the “Fund”), a sub-fund of Trium UCITS Platform plc (the “Company”)

Investment Objective and Policy

The Fund seeks to grow your investment over time and to preserve the amount invested through the use of a long/short strategy.

The Fund will principally invest, directly and indirectly through FDI, in European Equities taking both long and short positions to minimise fluctuations in share price. In long positions the Fund buys and holds an investment to benefit from a growth in value. In short positions the Fund takes exposure, through FDI, in a manner so as to benefit from a fall in an investment’s value.

The Investment Manager will select securities that it considers, on the long side, are materially under-valued and, on the short side, are materially over-valued.

The Fund may also, for cash management purposes, invest in fixed-income instruments (including sovereign, corporate or government bonds which may be fixed or floating, investment grade as rated by a recognised credit rating agency).

The Fund may invest in FDIs (i) for investment purposes, (ii) to attempt to hedge some of its investment risk, or (iii) for the purposes of efficient portfolio management. The Fund’s use of FDI may introduce leverage into the Fund, the risk of which is discussed under FDI and Leverage Risk below.

Any income less expenses realised will be accumulated and reinvested into the net assets of the Fund.

Investors can redeem shares each day (except Saturdays and Sundays) on which banks in London, Dublin and Zurich are open for regular business.

For full investment objective and policy details, please refer to the “Investment Objective” and “Investment Policy” sections of the Fund’s supplement.

Recommendation: This Fund is suitable for investors who can maintain their investment for 3-5 years.

European Equities: equity and equity-related securities (including warrants (right to purchase securities from the issuer at a specific price within a certain time frame) and convertibles (debt securities or preferred stocks which may be converted into common stock at a specific price)) that are: (i) listed on a European stock exchange or market, and/or (ii) the securities of businesses with a substantial operation in Europe.

FDIs (Financial Derivative Instrument): a contract between two or more parties whose value depends on the rise and fall of the underlying asset.

Risk and Reward Profile

The Fund is categorised as a 4 due to its exposure to equity markets and concentration in Europe which, when combined with its use of FDI, may cause the price of shares to fluctuate moderately.

The risk indicator was calculated using simulated data and may not be a reliable indicator of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean 'risk free'.

The Fund is exposed to additional risks not captured by the risk indicator including, without limitation:

Equities Risk: equity investments are subject to greater price fluctuation than other asset classes due to such factors as a company’s business performance, investor perceptions, stock market trends and general economic conditions which cause the Fund’s share price to fluctuate more rapidly.

FDI and Leverage Risk: FDI may fluctuate in value rapidly and certain FDI may introduce leverage, which may result in losses that are greater than the original amount invested.

Concentration Risk: because the Fund focuses investment in a smaller number of investments in Europe, events impacting a specific issuer or European markets generally may have a greater adverse impact on performance than in a more broadly invested or geographically diversified fund.

Convertibles Risk: the Fund is exposed to the risk that the issuer of the debt or preferred stock portion of the security may fail to meet its obligations, as well as the performance associated risks of the underlying stock into which it can be converted.

Counterparty/Custodial Risk: a party with whom the Fund contracts for securities or to safekeep the Fund’s assets may fail to meet its obligations or become bankrupt, which may expose the Fund to a financial loss.

Liquidity Risk: there may be insufficient buyers or sellers to allow the Fund to buy or sell certain types of securities readily which may impact the Fund’s performance or (in extreme circumstances) an investor’s ability to redeem.

Currency Risk: changes in exchange rates may reduce or increase the returns an investor might expect to receive independent of performance where the Fund invests in non-Euro securities.

Class Currency Hedging Risk: while the Fund may attempt to hedge against currency fluctuations for non-Euro classes, there can be no guarantee that the value of such class will not be affected by fluctuations in the Euro against the relevant currency. (This applies to Representative Share Classes in Practical Information below).

Operational Risk: human error, system and/or process failures, inadequate procedures or controls may cause losses to the Fund.

Please refer to the section entitled “Investment Risks and Special Considerations” in the Company’s prospectus for additional information on these and other risks associated with an investment in the Fund.
