

remove **beds, chew toys, and bones** to avoid spray and mist from pest control agents, and use **crates or kennels** to keep pets away from treated areas for at least 24 hours

tell pest control experts about pets at home

cover cages with a towel & remove all **perches** in treatment areas

PET FRIENDLY PEST CONTROL EXPERTS

remove small **animal cages** and avoid having pets come into contact with pest control traps and bait

TIPS FOR PET OWNERS

if you keep exotic birds and reptiles **ask your vet** about safe pest control

move toys, litterbox and beds & use a **travel carrier** to contain pets

use solutions that are **pet-friendly** and **non-toxic** to animals

small animals can be attracted to strong scents from treatment products - **ask your pest control expert** how long they should remain contained until the area is safe for pets

fish tanks should be properly covered to avoid product spray, and temporarily **shut filter pumps** to avoid contaminating the water

keeping your pets safe during pest control treatments
