

THE TRUTH ABOUT TERMITES

Subterranean termites are found in
EVERY STATE
(except Alaska)

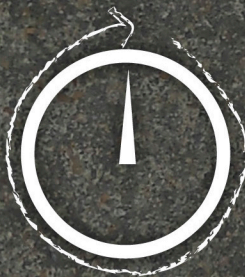

10%

of the world's mass of
living organisms is
composed of termites

THERE ARE ABOUT 2000

known species of termites in the world

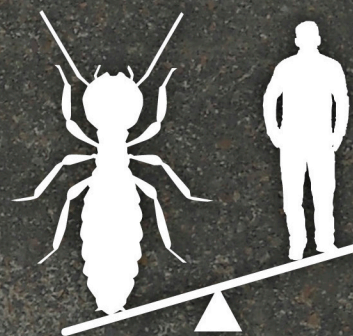

TERMITES EAT NON-STOP

24 hours a day/7 days a week

Formosan termite
queens can produce up to
1000 EGGS A DAY

The total weight of
all termites in the
world is more than the
weight of all humans

Worker termites search
for food up to 250 feet
from their colony

A single colony of Formosan or
super termites could eat the whole
structure of a home within

2 YEARS

Each year, termites cause more than

\$5 BILLION IN PROPERTY DAMAGE

\$0 =

Amount of termite
damage covered by
homeowners insurance*

*Typically, insurance companies consider most pest infestations and accompanying damage as maintenance issues and are therefore not covered by homeowners' policies.
