

The Crossroads Center Mission Statement

To provide culturally and linguistically congruent, comprehensive behavioral healthcare in a holistic manner, assuring access and quality to our diverse customers.

These services will be consistent with the organization's philosophy to implement state of the art programs that promote abstinence, prevent or remediate substance abuse and mental illness, and other behavioral disorders that place families and children at risk.

To achieve our mission, we reaffirm that all persons have the right to be healthy and to lead productive lives. We pledge to serve our customers, their families and the community to the best of our abilities.

Core Values

1. We believe that differences in culture and ethnicity among our clients, staff and customers contribute positively to the treatment and healing processes that occur within our programs.
2. We believe that all people are worthy and we respect all people.
3. We believe in the strength of families, and we believe that families can contribute to the successful treatment of our clients.
4. We believe that it is The Crossroads Center's responsibility to assure that quality services are provided to all of our clients and to all of our customers.
5. We believe that success is determined by continuous improvement of our products and services.

Medication Assisted Treatment Programs

The **Crossroads**  **Center**
Helping People Turn Their Lives Around

Licensed & Certified

The Crossroads Medication Assisted Treatment Program is licensed by the Ohio Department of Mental Health and Addiction Services to administer and dispense narcotic medications for either ambulatory detoxification treatment, residential, outpatient or maintenance therapy to persons who have become addicted to narcotics/opiates. It is certified for safety and quality by the Commission on Accreditation of Rehabilitation Facilities (CARF).

Admission Criteria:

- Individuals 18 years of age or older who are addicted to narcotics.
- Medically stable.
- Live within a 50-mile radius of the facility.

Methadone and Opioid Treatment Program

The Methadone and Opiate Treatment Program (OTP) treat people addicted to opiates. The clinical staff includes a Medical Director specializing in addiction medicine and psychiatry, an Advanced Registered Nurse Practitioner specializing in addiction medicine, a Program Director, Registered Nurses, Licensed Practical Nurses and Alcohol and Drug Therapists with significant experience in treating opiate dependence.

The Medication Assisted Program's (MAP) philosophy and objectives are to provide respectful, humane, state of the art clinical and holistic care for all of its clients. By achieving remission of addiction, the client can then focus on relearning healthy and sober coping behaviors in an effort to improve their lifestyle and once again become an integral part of their family and community.

What sets MAP apart from other treatment programs is the care it provides for all of its clients as well as other services usually not seen with this type of program. MAP provides onsite psychiatric care for many of its clients. Along with local OB-GYN clinics, it follows pregnant clients, markedly improving the health of the baby and mother. MAP, along with other Crossroads Center programs, is able to provide the level of care needed for all phases of recovery.

This program is located in the same building as The Crossroads Center but the address is 3009 Burnet Avenue, Cincinnati, Ohio 45219.

**MAP's Direct Line:
513-332-0350.**

Suboxone Treatment Program

The Crossroads Center has a Suboxone treatment program. This medication management program provides the following services: opiate addiction evaluation, ambulatory detoxification, stabilization and maintenance. When needed, this program also provides dual-diagnosis (concurrent mental health) evaluation and treatment. The Medical Director is an Addiction Psychiatrist.
