

Program

Friday, October 22, 2021

- 05:55 PM – Join Virtual Lectures
- 06:00 PM – Welcome & Introduction
- 06:15 PM – Prevention of Farm Incidents
- 07:00 PM – From the Field to the E.R.
Dept. – Pt Management
- 07:45 PM – Break
- 08:00 PM – Pediatric Trauma on the Farm
- 08:45 PM – Case Studies / Success Stories
- 09:30 PM – Adjourn

Saturday, October 23, 2021

- 07:00 AM – Welcome/Breakfast
- 08:00 AM – Workshops Running
Concurrently (A, B, C, D, E)
- 09:30 AM – Break
- 09:45 AM – Workshops Continued
- 11:15 AM – Break
- 11:30 AM – Presentation - Working with
the Media
- 12:00 PM – Lunch/ Visit booths
- 1:00 PM – Workshops Continued
- 2:30 PM – Break
- 2:45 PM – Workshops Continued
- 4:15 PM – Adjourn

Dress

Participants are encouraged to dress in anticipation for an active day on Saturday. Appropriate PPE includes full turnout gear, or extrication gear including boots/safety shoes, gloves, helmets and eye protection. No SCBA required. Each course enrollee is responsible for providing these items. As workshops are held outdoors, be prepared in case of inclement weather.

Farm Medicine Center

Introduction

Emergency Response to farm incidents remains a challenge to rescue services. It is also challenging when less personnel in today's rural departments have an agricultural background. We are providing a program designed for EMT's and rescue personnel, to supplement basic emergency training with training for dealing with agricultural incidents.

This program will challenge your knowledge regarding some specific farm incident situations while providing "take home and use" information.

Registration

Please register by **October 8th, 2021**. The program registration fee is \$75/participant. Registration after, October 8th, will increase to \$100/participant. Registration fee includes all meal services provided during the event(s) registered for as well as all program materials. Attendance is limited to 100 in order to maximize the hands-on component of the workshops. Advanced registration is required. If cancellations are received within 72 hours of the program, the registration fee will be refunded less a \$10 administrative fee.

How to Register

Online: agrescue.org

Mail: Marshfield Clinic Health System Inc., Conference Registration-GR, 1000 North Oak Avenue, Marshfield, WI 54449

Fax: 715-389-3770

The conference reserves the right to cancel due to insufficient enrollment or due to COVID-19.

Registration forms and payment information can be found at agrescue.org

CEUs

Certificates validating 9.5 hours of CEUs upon completion, pre/post test questions, and evaluation of the program will be awarded.

Location

Friday, October 22, 2021 portion of the program will be held virtually via a live presentation format with Q&A. Saturday, October 23, 2020 portion of the program will be held at the Heiman Holsteins dairy farm in Marshfield, WI.

Four Gas Monitor

On behalf of the Mike Biadasz Farm Safety and Education Memorial Fund, we will be providing a free, four-gas monitor if three or more personnel from your department register and attend the A.R.T. training in October. The meters supplied for the A.R.T. program are intended to keep all of your personnel safe as well as the agricultural community that we hope will utilize them with your guidance.

Workshops

A - Farm Familiarization

This workshop is designed to familiarize the rescuer to various farm equipment and structures that may be encountered. Emergency shutdown procedures, equipment operation, storage hazards are all to be covered. A "must attend" for any personnel not familiar with this environment.

B - Tractor Rollover

More common tractor overturns and discussion of stabilization techniques as well as emergency medical concerns with hands on experience will be showcased in this workshop.

C - Equipment Extrication

Principles of machinery extrication will be discussed as well as hands on incident size-up, extrication and patient handling will be performed in this workshop.

D - Silo Rescue

This workshop will be an on scene presentation of the needs to perform a safe rescue from a silo. Ropes, rigging, anchors, knots and harnesses will be utilized during the evolution. By utilization of an actual silo and equipment on the farm, personnel will be better prepared for the silo rescue.

E - Grain Bin Rescue

Similar to the silo rescue, grain bins have their own unique hazards. Utilizing safety equipment, this workshop will be an on scene presentation of the needs to perform a safe rescue from a grain bin.
